

In Reference to RM-10805 through RM-10811.

I am not in favor of removing Element 1 at all.

I believe that those persons willing to exceed in this hobby are willing to study for and pass the 5wpm code exam. HF access should not be handed to those not willing to complete one of the requirements. Simply because other Countries have done away with Code does not mean the U.S. should follow. Everybody wants something for nothing.
